- Devops(Docker,Terraform)

Coding language
C, CPP,PYTHON,JAVASCRIPT

Productivity Enhancement Through AI tools
Leveraging advanced AI tools to significantly boost productivity, allowing me to complete tasks that typically take a week in just 6 hours.

Projects

2024/08 – 2024/08	**Pokemon game** ⧉ Developed an interactive Pokémon adoption game using React, Firebase Authentication, and Firestore for data storage. Styled with HTML and CSS, and deployed on Netlify. Features a unique adoption system and a maintenance mechanism requiring users to feed and maintain their Pokémon's health.
2024/08 – 2024/08	**Manage SPOTIFY using TERRAFORM!** Automated Spotify playlist management using Terraform and Spotify API. Implemented Terraform scripts for dynamic Spotify playlist and track management.
2024/04 – 2024/05	**Slx (Reg. ID: IJNRD_214346)** ⧉ *Student online exchange* Developed an academic resource-sharing platform using the MERN stack, Firebase for authentication, and Firestore for data storage. Styled with HTML and CSS, and deployed on Netlify. Enables users to share and access academic materials securely. Future enhancements include Google API integration and a CI/CD pipeline.

Certificates

Preparing for azure fundamentals
I am strongly interested in DevOps and am actively preparing for the Azure Fundamentals exam.

Full stack web development
I have completed a full stack development course by Angela Yu, gaining comprehensive skills in both front-end and back-end technologies.
